

ARE YOUR LOGISTICS STUDENTS INDUSTRY-READY?

Give Them Real-World Logistics Experience with LogiQ Global (LTMS)

India's Premier Logistics Simulation & Operations Management Software for Higher Education
Bridging the Gap Between Classroom Theory & Corporate Reality

Today's logistics industry expects graduates who can contribute from Day One. While classroom learning builds theoretical knowledge, employers increasingly seek candidates with hands-on experience using logistics management software. LogiQ Global bridges this gap by providing students with practical exposure to real-world logistics operations in a simulated business environment.

WHY PARTNER WITH LOGIQ GLOBAL?

 Value-Added Add-on Program Easily integrate LogiQ Global into your existing Logistics or Supply Chain curriculum as a practical skill enhancement program.	 Industry Simulation Students perform complete logistics workflows including Road Transport, Courier Operations, Air Freight, Sea Freight, Billing, Documentation and Accounting.	 Better Placement Opportunities Equip students with software skills that logistics companies actively look for during recruitment.	 User-Friendly Platform Designed for both faculty and students with an intuitive interface that requires minimal learning time.
